RE: Invitation to Information Session for Buffalo Plains Wind Farm on October 14th at 7:00PM

Dear Stakeholder,

ABO Wind Canada Ltd. (ABO Wind) is developing the proposed Buffalo Plains Wind Farm (the Project) near Lomond, Alberta. The Project is planned to deliver 500 megawatts (MW) of generating capacity, being comprised of 83 total turbine towers. The proposed Project boundary covers approximately 17,500 acres of privately-owned, cultivated land in Vulcan County, and only a few hundred acres will be permanently removed from cultivation once the Project is complete.

ABO Wind began development of the Project in June 2018 and has previously mailed out stakeholder newsletters and project specific information packages in November 2018, March 2019, January 2020 & April 2020 as we progressed through design. Additionally, we have held two open houses (November 28th 2018 & March 27th 2019) to present information and collect stakeholder feedback about the Project. We have taken the feedback received and integrate it into our final Project design, wherever feasible.

We are excited to invite you to our online information session to present the final Project design:

Wednesday, October 14th, 2020

Presentation starts at 7:00PM

www.zoom.us/j/5873558723

Type the above link into your web browser

Or dial in using +1 (587) 328-1099, 5873558723#

Submit questions by October 7th, 2020

Questions can be submitted through mail or electronic mail and will be answered publicly during the information session. Additional questions can be submitted after the information session to canada@abo-wind.com and will be addressed by a Project Representative

Email canada@abo-wind.com or visit www.buffaloplainswindfarm.com

Can't attend? Email us and we will send you a hard copy of the presentation or find it on our website after the session

Due to ongoing Covid-19 concerns, and for the safety of our team and the community the information session will be held online. We have set up a website link for stakeholders to attend. Please type the link above into your web browser which will bring you directly to our presentation. The presentation will start with a brief introduction of the Project, an introduction to our team and representatives and continue into the slides providing details about the Project and its final design. We encourage questions and would kindly ask that they be sent directly to us by October 7th, 2020. Please feel free to mail any questions or concerns directly to:

Buffalo Plains Wind Farm Inc.
#210, 3015 12th Street NE
Calgary AB T2E 7J2

We will also be accepting questions in electronic mail format sent to canada@abo-wind.com. If you have any concerns attending the information session or submitting questions, please feel free to contact us at your convenience. We are happy to assist wherever possible. If you are unable to attend the information session and would like to receive the presentation slides, we would be happy to send them directly to you upon request or they'll be made available after the session on our website www.buffaloplainswindfarm.com.

Provided with this invitation is a list of Project updates including a map with a final layout showing turbine locations, access roads, and other Project details, as well as a resource brochure about Project benefits and wind power in general. You will also find an Alberta Utilities Commission (AUC) brochure which provides detail about how to get involved in the AUC Process.

We will have Project representatives and subject matter experts online to discuss their relevant topics and answer the received questions. We look forward to sharing more information with you and discussing this exciting project!

Yours sincerely,

Keaton Lever
Chief Development Officer

Project Updates

ABO Wind has been actively engaged with the community and industry stakeholders and has now made the final adjustments to the Project layout.

Considering feedback and reduction in noise and shadow flicker impact, Buffalo Plains has re-sited turbine locations and amended the Project boundary. To reduce potential impact to stakeholders as well as wildlife & environmental considerations, we have adjusted the following turbine locations;

Infrastructure	Change	Reason
T-16	Moved 30m West	Reduce Noise Impact on R-25
T-25	Moved 20m North	Reduce Noise Impact on R-25
T-33	Moved 80m SE	Environmental Consideration
T-61	Moved 15m NE	Reduce Noise Impact on R-08
T-62	Moved 100m North	Reduce Noise Impact on R-08
T-73	Moved 140m South	Reduce Noise Impact on R-17 and Noise & Shadow Impact on R-58
T-74	Moved 50m East	Reduce Noise & Shadow Impact on R-39
T-75	Moved 270m West	Reduce Noise Impact on R-39
T-76	Moved 25m South	Stakeholder Feedback
T-80	Moved 100m East	Reduce Noise Impact on R-39
T-88	Moved 165m East	Reduce Shadow Impact on R-42, R-20 & R-111
T-89	Moved 200m East	Reduce Noise & Shadow Impact on R-42 and reduce Noise Impact for R-20
T-90	Moved 5m North	Industry Stakeholder Request

Buffalo Plains Wind Farm Inc.

To reduce environmental considerations and compress the Project footprint Buffalo Plains has condensed the Project boundary by removing the following lands

Meridian	Range	Township	Section	Quarter	Descriptor
4	20	15	30	NW	East 1/2
4	20	15	31	NE	Full
4	20	15	31	NW	Full

4	21	16	36	NE	Full
4	21	17	1	SE	South 1/2
4	21	17	2	NW	West 1/2
4	21	17	2	SE	West 1/2
4	21	17	3	NE	Full
4	21	17	10	NW	Full
4	21	17	10	SW	Full
4	21	17	11	SW	SW 1/4
4	21	17	13	NW	North 1/2
4	21	17	14	NE	North 1/2

Accompanying this is a map depicting the changes to the Project boundary and the turbine location adjustments. Updated noise and shadow flicker reports will be provided during the information session and available on our website shortly thereafter.

Information collected at Open Houses and the overall consultation and engagement process will be compiled and included in Buffalo Plain's application for submission to the AUC to seek a permit and license to construct, own and operate the Project.
